AI in Healthcare

AI as the driving force of Innovation in Healthcare:
Trends, Applications, Entrepreneurship

May 25-26, 2019

Acıbadem University

Important Dates

Paper Submission:
April 22, 2019

Notification:
May 6, 2019

www.acibadem.edu.tr/aiconf2019

Use of AI in healthcare is expected to increase in the very near future. We are organizing this meeting to bring together the experts, companies, researchers and entrepreneurs to drive the innovation in this field.

We welcome universities, research centres, start-ups and companies to exhibit their products and projects for their networking efforts.

Keynote Speeches:

Hilmi Ege, MD, PhD
"How can AI help me become a better Physician?"
Acıbadem University and
Acıbadem Bodrum Hospital

Neşet Hikmet, PhD
"Big Data Analytics in Healthcare"
IBM data Analytics Centre, University of South Carolina

Conference Topics:

- Applications in Radiology, Oncology, Cardiology, Intensive Care, Emergency Medicine, etc.
- Big Data Analysis in Healthcare
- Machine Learning, knowledge discovery in healthcare
- Natural Language Processing
- Rapid reporting
- Neural Network applications
- Bayesian networks, fuzzy logic, decision tree applications in healthcare
- Optimization of Healthcare processes
- Clinical decision support systems
- Electronic health records
- AI in Mobile Healthcare applications
- AI in Health economics
- AI in bioinformatics
- AI in robotic surgery
- AI in surgical planning
- AI in diagnostic and therapeutic applications
