Mehmet Ali Aydınlar
Chairman of Board of Trustees
Dear Students,

Acıbadem University is a leading institution which transfers the Acıbadem culture, consisting of accumulation of knowledge and experience for 25 years, to the field of education. We have made a difference by reflecting our pioneering and holistic perspective gained with the experience in health sector to the education offered by us. You can see this difference at any point necessary for a student from the campus to the laboratory, from the educational staff to the social facilities. Because, we approach the university years as a holistic process in which our students prepare for life with all aspects.

The objective of our university since its establishment is to become one of the world's leading universities in health field, not only in Turkey. This objective is a passion for us! When you are enthusiastically attached to an objective, you will not only imagine the present but also the future, and you will shape every step you take, accordingly. We have also taken steps to turn our dreams into reality with great speed and continue in the same way... Clinical Simulation and Advanced Endoscopic - Robotic Surgery Training Center (CASE) is one of the samples indicating our claim to be the best in the world, not only in Turkey, with its advanced technology infrastructure and hardware. It is one of the two medical simulation centers of the world that received the “Center of Excellence” award by CAE Healthcare Academy. Having different accreditations by respected institutions of the world, CASE has become a center of attraction and reference not only for our students but also for thousands of specialists from various countries.

We have developed the education and opportunities we offer according to the needs of the future, not just today. We train our graduates as professionals for the sector. We strive to support our students in their career planning. Successful students targeting the Acıbadem Healthcare Group in their careers are considered as priority within the group’s need for employment.

Our students and graduates, who are evaluating the opportunities of Acıbadem University, who pursue their dreams and regard university life as a part of their future, continue to make us proud with their success today.

While shaping your future, your choice of university will be an important turning point both in your life and your career plan. I am sure that your efforts to reach your dreams and your experience in university will guide you on this path.

I wish you all success.
Dear Students,

Acıbadem University has had two major powers that have gained momentum for its establishment and development; the first is the desire to transfer the accumulated experience and knowledge gained while providing quality healthcare services in Acıbadem Healthcare Group to the next generation. The second is the willingness of leading academicians of our country working in the group to contribute to the health sciences by educating students and conducting researches.

With our contemporary and research-oriented education programs, we aim to educate our students as well-equipped researchers, interrogators and productive healthcare professionals. We strive for our students to maintain their enthusiasm while starting university during their education life and reflect this passion in their professional life. In accordance with this purpose, we endeavor to provide our students with academic and social environment necessary for their professional and individual development.

While proceeding along your objectives, university life is an important step towards the future. University education, which is preferred in the light of specified objectives, will also lead you to success.

Therefore, research and gain information in university preference process for your future.

Because a healthy future is born from a strong preference.
Why Acıbadem University?

- A thematic university on healthcare
- Dynamic and contemporary educational programs
- Experienced academic staff
- Research focused university
- Advanced simulation in health education
- A city university which makes difference with its social facilities
- Close cooperation with health sector
- Success and support scholarships
Academic Opportunities
ENGLISH PREPARATION PROGRAM

Students who will be studying in undergraduate programs in English take Acıbadem University English Proficiency and Placement Test (APPT) before the start of new academic year. Students who are successful in this examination or who have sufficient score(s) in the exams listed below (in the last three years) are exempt from the English Preparation Program. Students who have insufficient English level are placed in groups according to the APPT results and are taught in Intensive English Preparation Program. Undergraduate students who successfully complete this program continue their undergraduate programs.

**Other exams accepted valid**

LANGUAGE TRAINING IN UNDERGRADUATE AND ASSOCIATE DEGREE PROGRAMS

English language proficiency of the students in undergraduate programs with Turkish education language is determined by English Proficiency and Placement Test (APPT/Acıbadem Proficiency and Placement Test).

New students enrolling at the university take APPT Exam before the academic year starts and are exempt from the relevant English course according to the result of this examination. Students who are not exempt take English lessons 5 hours per week according to their level. At the end of the first three years, B1 is the level of English language proficiency targeted by the successful completion of “General English” courses. All students take English / ESP Course for Special Purpose in the final year.

Education language of associate degree programs is Turkish. Vocational English courses are given to the students during the 3rd and 4th semesters.
Double Major / Minor

There are double major / minor opportunities available in Acıbadem University. Students have the opportunity to do double major / minor in the programs approved by faculties with the condition of meeting necessary requirements.

Students are thus entitled to graduate with two different diplomas by taking simultaneous courses in the second undergraduate program with double major program and receive minor certificate by taking required number of courses from a second undergraduate program with minor program.
Clinical Simulation and Advanced Endoscopic - Robotic Surgery Training Center - CASE, is the most comprehensive medical training center in the world with its departments and technological infrastructure. Pre and post-graduate training programs are carried out at the center where a special education model is applied with simulated patients, electronic learning and skill laboratories and advanced technological medical simulators. Center consists of two departments as Clinical Simulation Training Center and Advanced Level Endoscopic - Robotic Surgery Training Center. Clinical Simulation Training Center uses a blended training methodology for students with electronic learning, simulated patients and simulation applications. Medical simulation training is used in conjunction with training modules in the virtual reality laboratory. In the Clinical Simulation Training Center, designed as a virtual hospital, students are prepared for the internships in clinical training by implementing different crisis scenarios.

Postgraduate specialist training is carried out at the Advanced Endoscopic - Robotic Surgery Training Center, established to develop the skills of specialist surgeons in the field of endoscopy and robotic surgery.

**CASE is accredited by Network of Accredited Clinical Skills Centers of Europe (NASCE) and Society for Simulation in Healthcare (SSH).**

CASE has the title “**Global Training Center**” in the field of robotic surgery. CASE is one of the two medical simulation centers in the world awarded with “**Center of Excellence**” by CAE Healthcare Academy.

Career Opportunities

Acibadem University supports students preparing for professional life during university life by offering internships and part-time job opportunities with close cooperation with health sector.

PART-TIME STUDENT EMPLOYMENT PROGRAM

Students can be evaluated within the program and get the opportunity to work in various units of university while continuing their education.

Sena Akbulut
Sophomore in Psychology Department

I am a student in psychology department. I am working part time in the university under the Part-Time Student Employment Program. I applied this program to experience working life as a student. I am a kind of an assistant at the department, and undertake various duties in the department.
INTERNERSHIP and
PART-TIME JOB
OPPORTUNITIES

Thanks to close cooperation of the university with the health sector, students have the opportunity work part-time or do internship according to convenience of their course schedule.

Fatih Ölmez
2013 Graduate from Healthcare Management
Foreign Investments and Operations Representative of Acıbadem Healthcare Group

*I performed internships in all departments from patient admittance to marketing-purchasing within Acıbadem Healthcare Group since the first year of university. University contributed me a lot during this process.*
