MESSAGE OF RECTOR

Dear Students,

Acibadem University is a young and thematic university in the area of health sciences. There have been two great powers that have accelerated the establishment and development of Acibadem University; first of which is the wish for of Acibadem Healthcare Group to pass on the experience gained and knowledge acquired while offering quality health care services, to future generations. The second is the wish of the leading academicians of our country working within the group wishing to contribute to the health sciences by educating students and their research.

Educating professionals who are knowledgeable in all areas of health, who are researching, and questioning with our student centred, dynamic and modern education programs which encourage research is the main objective of our university.

In line with these objectives, we are paying special attention to the infrastructure work required to offer world class education. The contribution of our simulation centre to students, who in all our education programs first learn from dozens of scenarios before encountering patients, is incredible. We know that the bar on health education is now in a different place, and that Acibadem moved that bar much higher...

We are chasing all kinds of innovation to strengthen education, and we will continue to do so. Learning what we do not know is also an absolute must for us too, but we are teaching what we already know well. Our efforts to improve will always continue, and we will look to the future with strength, confidence and hope...

MESSAGE FROM HEAD OF NURSING DEPARTMENT

Nursing is an applied health discipline based on scientific knowledge. It has a multi-faceted responsibility and role for the individual, family and society in meeting the needs such as care, relaxation, healing and information that people need at every stage of their life process. Nursing interventions applied in today's health care environment are carried out with the use of evidence based on research results. In order to meet the needs of the individual, family and society, the nurse initiates and makes clinical decisions in line with his knowledge. In order for nursing care to be effective, safe and adequate, interventions must be carefully and critically evaluated. All these reveal the necessity of continuing the theory and practice of nursing professional education with contemporary methods, with a philosophical belief in the uniqueness of human beings.

Aiming to train qualified manpower, in Acibadem University Faculty of Health Sciences Nursing Department; As in the training programs of all disciplines based on practice, theoretical knowledge and clinical experience are integral parts that complement each other. At Kerem Aydınlar Campus, which is equipped with modern technology that supports its philosophy, vision, mission and nursing education values, we put it into practice in university hospitals by providing training with simulation laboratories and equipment, where each student can transfer their theoretical education into practice.

As a result, the department aims to train world-class nurses who can provide excellent evidence-based care to the patient/healthy individual.

Education Model of the Program

Nursing undergraduate program was created in the "Classical Education Model", which is one of the programs based on the structure of the disciplines. The purpose of the disciplinary programs is to teach the concepts, theories and principles specific to that discipline, research, practice, education and management. In this way, it is essential to integrate, organize, show and develop the limits and gaps of the knowledge that falls within the field of discipline. In the structuring of the Acibadem Mehmet Ali Aydınlar University Nursing Department model, developments in meeting the health care needs of the society on a national and international scale were taken into account. The program consists of theoretical and practical parts of nursing education in the Classical Education Model. Lessons are carried out by academic members / staff who are experts in their fields. In line with the classical education model, all departments include course contents; It is planned within the framework of the main concepts of human, health/disease, environment and nursing and is carried out by using active learning methods to support students' learning at cognitive, psychomotor and affective levels. Different nursing models and theories are used while conducting courses specific to the department. Nursing Model Based on Life Activities, Functional Health Patterns Model, OMAHA Classification System, Adaptation Model, Interpersonal Communication Model and Human-People Relationship Model are the models used in the program. ACU members can access to the subscribed databases from out of the campus.

Library Trainings: Library staff provide library training to students in line with the demands of faculties and colleges. Trainings can be done in one part of the course, one or more sessions can be organized. In the trainings, information is given on the use of library catalogs, access to library databases and searching for academic publications. In addition, author workshops for young academics and graduate students and user trainings specific to certain databases can be organized.

INTERNATIONAL OFFICE

The ERASMUS+ Program covers projects that enable higher education institutions to realize student and staff (academic and administrative) mobility by partnering with higher education institutions in the program countries. With this activity, it is aimed to improve the qualifications of higher education students and staff and to provide these people with professional development opportunities abroad. Thus, to higher education or some higher education institutions to increase opportunities for overseas training of new graduates in continuing education to gain the skills they need to make the transition from business to higher education or improve their skills to obtain knowledge of the practice of pedagogical personnel, it is intended to work.

Acibadem Mehmet Ali Aydınlar University has been carrying out student and staff (academic and administrative) mobility within the scope of the program since 2009.

Students, faculty members / staff and administrative staff of the Faculty of Health Sciences can participate in Erasmus+ programs at another higher education institution during certain periods. Acibadem University International Students and Academic Relations Office (UO) organizes an information meeting about program promotion and processes every year during the application periods. Information about the applications is announced on the website of our university and also announced to the students and staff by e-mail.
