Dear students,

After three years of intense preclinical education, you will be starting to study clinical branches and take your first steps in the hospital as “young doctors”. First, we would like to congratulate you and wish you success in all your clerkships.

In this year, you will not only take dense theoretical education but also you will experience your first practical medical training. You will be expected to acquire all the skills and experience necessary for practicing general medicine by your trainers.

Term IV at the School of Medicine takes place at Acibadem Mehmet Ali Aydınlar University Kerem Aydınlar Campus, at the affiliated hospitals (Atakent and Maslak) and other health institutions. The theoretical education program is concordant with the primary health-care program, called as “UÇEP” (Ulusal Çekirdek Eğitim Programı). Accordingly, Term IV students may be assigned to a different primary, secondary or tertiary health-care institutions with suggestions from the Curriculum Development Committee, Program Coordinators, and upon approval from the Faculty Board and Dean. Such an assignment occurs as the education program is prepared considering the Term IV training based on the work principals of the department. These assignments may take place at in-patient and outpatient clinics, operating rooms, laboratories, primary care facilities and in community.

During this term, your clerkships will be in the Department of Internal Medicine (10 weeks), Cardiovascular Medicine (4 weeks), Pediatrics (10 weeks), General Surgery (8 weeks) and Obstetrics and Gynecology (6 weeks). You will have 2 weeks of Midyear Recess during this academic year, which will be in different time periods according to your group. This year Pediatrics Clerkship has been almost completely changed to a more interactive education form structurally, theoretically and practically. We suggest you keep this Guide Book with you, which contains all necessary information you will need during the Clerkships. The supervising faculty member in all stages will also provide further information.

In Acibadem Mehmet Ali Aydınlar University School of Medicine, our aim is to educate doctors of tomorrow as individuals who practice evidence-based medicine, acknowledge the importance of research, who are inquisitive, honest and work for the well-being of humanity. Being a doctor does not require only theoretical knowledge; it also requires self-respect, high quality doctor-patient

relationships and hands-on experience. On this term, you will be expected to obtain all these qualifications by observing your faculty members while improving your medical knowledge and communication skills.

Please do not forget that the appearance and behavior of yours should be appropriate for the honorable doctor profession in all stages. You should always consider the patient confidentiality, while respect and punctuality must be your main priority during your clerkships.

Term IV is an influential and hard year to grow up, study, learn and gain experience but you will feel “like a doctor”. We wish you all a successful year.

Clerkship Aims

Internal Medicine (IM) education program is an integrated program involving all disciplines within the framework of the internal medicine department in cooperation with closely related clinical disciplines including pulmonary medicine and infectious diseases. Students will be able to practically apply what they have learned in the theoretical lectures formatted either in the form of lectures or case discussions.

The Internal Medicine Program is a 10-week rotation during the fourth year. Both theoretical and practical courses will be held mainly in Atakent Acibadem Hospital. The program includes 2-3 days of theoretical lessons followed by 4-6 days of practical sessions. Practical sessions include morning rounds, bed-sides and case presentations under the supervision of the attending physicians. In the practical sessions, the students will be guided by a responsible consultant who is going to provide each student with the opportunity to learn basic principles of internal medicine, not only through direct patient contact, but also by observing and interacting with faculty and house staff. Practical sessions include morning rounds, bed-sides and case presentations. Bedside education as an integral part of 4th year Internal Medicine Education Program, representing a synthesis of proper history taking, physical examination, differential diagnosis, clinical reasoning together with effective patient communication skills.

The main goal of the Internal Medicine Program is to develop a comprehensive process of incorporating history, physical examination, and results from various tests to arrive at a logical differential diagnosis. The student should be able to outline specific studies to prove or disprove the diagnosis and in general fashion, to describe an appropriate treatment plan. Internal Medicine Program does not encompass all aspects of internal medicine nor is it designed to recruit or develop internists. It is designed to provide the basic skills necessary to produce well-trained junior medical students.

The major aims of this program are:

1. To improve the student's ability to obtain a history, perform a physical examination, and then present these findings in a logical and concise manner.
2. To develop a problem-oriented method of patient evaluation.
3. To recognize the risks/benefits of medical interventions.
4. To become familiar with humanistic and ethical considerations involved in patient care.
5. To develop conduct and behaviour appropriate for a medical professional.
6. To develop and encourage a medical curiosity which will stimulate the student to continue a life-long system of self-education.
7. To develop an evidence-based approach to medical management
8. To encourage and motivate students for clinical and basic research.

General information

The first week of the IM program is dedicated to history taking and physical examination. The rest of the program is divided into 5-6 day periods, each representing either an IM subspecialty activity or other relevant department activities such as Infectious Diseases and Pulmonary Medicine. The first 2-3 days of each period covers theoretical lessons and the remaining 3-4 days are practical sessions. Practical sessions usually start with morning rounds and/or case discussion meetings followed by bedside teaching. Thereafter, the students follow their consultant's program (outpatient clinic, endoscopy, tumour boards, pathology joint meeting etc.) in their daily outpatient practice. Theoretical lessons include case discussions and lectures. Theoretical and practical sessions will be held in Atakent and Maslak Acibadem Hospitals.

Responsibilities of the students

The responsibilities of the students during internal medicine clerkship are as follows:

1- Students are expected to participate in all theoretical and practical sessions.

2- There will be a mid-term exam towards the end of the IM program. The students **should prepare a patient record (dossier) during this exam. They will be asked to take the history of a patient and do the physical examination at the patient's bedside with the consultant.** This record will be evaluated and scored by the consultant. Each student will be assigned to a consultant and that list will be announced at the beginning of the IM program. Attendance to mid-term exam and submission of patient record is mandatory before written/oral examination, it also forms ten percent of the final score. A formal document for preparing patient record will be provided to students at the start of IM program.

3- Students are expected to actively participate to case discussions.

4- **Dress Code:** It is mandatory for you to wear a white coat and hold a name tag. During Internal Medicine Clerkship, we expect male students to wear a shirt and a neck tie with trousers and the female students to dress appropriate to hospital environment with comfortable shoes suitable for long hours standing. Students should always have their stethoscope with them in bedside education.

5- **Attendance Policy:** Students are expected to participate in every assignment indicated on their schedule. Absences may result in being compelled to repeat all or a portion of the outpatient component of the clerkship. (For further details please consult the Regulations for Education and Examination at the website)

If for some reasons, you are not able to come to any of the practical or theoretical sessions, please inform **Dr Leyla Özer (Medical Oncology/Atakent Hospital)** before the beginning of the session and ask to be excused. Unexcused absences will have to be made up.

Evaluations

A written and a bedside oral examination are scheduled at the last two days of the each 10-week IM program. The final score will be the sum of oral & written examination and the mid-term exam. **Ninety percent** of the final score will come from the mean of the written and oral examination and **ten percent** of the final score will be calculated as the mean of the mid-term exam.

Both examinations (written and oral) will cover topics listed as "learning outcomes" within this Manual. A sample of "History taking& Physical Examination" form will be provided in the first week of clerkship. Oral examination will assess your performance on history taking, physical examination and it will be accompanied with questions covering the topics you have learnt during this clerkship. Regarding to oral questions, you will have a separate sheet of oral examination questions/topics which will form the base of structured oral examination.

Depending on the calendar, there will be one day of study time before examinations. You will also have a consultant list who are going to be responsible for the practical sessions.

There are some recommended Internal Medicine text books which will help you to understand basic principles of IM throughout your clerkship period. A variety of high quality textbooks are available to you. The most commonly used ones are listed below. You are free to select one or two of them. Also, text- books are available here at the hospital library.

After the exam, your score will be announced only after you fill in and e-mail the clerkship evaluation form and deliver it to Dr Leyla Özer (Medical Oncology/Atakent Hospital) or Mrs. Leyla Karahan Hiz (leyla.karahan.hiz@acibadem.com) or Ms. Eda Arslan (eda.arslan@acibadem.com).

Accommodation:

We encourage you to give us a list of your e-mail addresses and cell phone numbers for access in case of any change in schedule. You can also use the Student Portal established on the Acibadem University website to receive updated information.

Lunch will be served at the hospital employee cafeteria.

Parking information will be provided by hospital management.

In all Acibadem Hospitals, if you encounter any problem related to IM clerkship, you can contact medical director's secretary (contact information will be provided by the university).

Welcome to Internal Medicine clerkship and we look forward to providing you with a satisfying **and pleasant** learning experience.

Performance-Based Assessment.

* Percentages of the assessment methods will be announced by the Department.

LEARNING OUTCOMES OF INTERNAL MEDICINE CLERKSHIP

1. Pulmonary diseases

- a. To address the symptoms of respiratory disease commonly encountered by the pulmonologist (cough, dyspnea, hemoptysis, cyanosis)
- b. To review the physiology, pathophysiology, differential diagnosis, pathogenesis, diagnosis and treatment of pulmonary edema, hypoxia, polycythemia.
- c. Understand methods available for the evaluation of patients with pulmonary diseases (x-ray, radionuclide scans, pulmonary function test, blood gas analysis)
- d. Be familiar with the common drugs used in the management of pulmonary diseases.
- e. Know the diagnosis and management of the following clinical problems:
 - ✓ Chronic obstructive pulmonary disease
 - ✓ Asthma, acute and chronic
 - ✓ Common pulmonary infections (pneumonia, bronchiolitis, tuberculosis, empyema, upper airway infections, bronchiectasis etc.)
 - ✓ Interstitial lung disease (Sarcoidosis, Goodpasture's Syndrome, etc.)
 - ✓ Pulmonary neoplasm's (lung cancer, mesothelioma)
 - ✓ Pleural disease (Pleurisy, pneumothorax)
 - ✓ Pulmonary vascular disease (Pulmonary hypertension, pulmonary embolism)

2. Nephrology

- a. Recognition of the clinical symptomatology and management of common renal diseases, e.g., acute glomerulonephritis, nephrotic syndrome, acute and chronic renal failure based on the pathophysiology of the disease process.
- b. Understanding the significance and physiologic principles of laboratory tests employed in the assessment of renal function.
- c. Understanding the normal physiology of fluid, electrolyte and acid base balance. Diagnosis and management of common electrolyte and acid base disorders.
- d. Understanding the immunologic mechanisms of renal disease. In-depth study of renal biopsy and correlation of renal histology with clinical renal diseases.
- e. Insight into the metabolic and endocrine functions of the kidneys and metabolic consequences of renal failure.
- f. Instructions pertaining to the diagnosis and management of various forms of hypertension, including renin-angiotensin aldosterone system.
- g. Diagnosis and management of acute and chronic medical problems in patients with renal disease and renal failure.
- h. Evaluation of the end-stage renal disease patients and choosing the optimal renal replacement treatment modality (dialysis versus transplantation).

3. Infectious Diseases

A. Approach to a patient with fever

- a. Take relevant history and perform focused clinical examination in a patient with fever.
- b. Formulate a differential diagnosis for patients with fever.
- c. Describe a clinical and laboratory approach to a patient with fever.
- d. Recognize and define systemic inflammatory response syndrome, sepsis and septic shock.
- e. Evaluate and make a differential diagnosis for patients with fever of unknown origin.
- f. Develop management plans for the patient with fever.

B. Approach to infectious diarrhea

- a. Take appropriate history of a patient having diarrhea and make a differential diagnosis of infectious and non-infectious diarrhea.
- b. Define the appropriate laboratory and procedural evaluation of a patient with diarrhea
- c. Be aware of symptomatic treatment and manage antibiotherapy regimens for diarrhea.

C. Health care associated infections:

- a. Make definitions of specific health care associated infections.
- b. Demonstrate knowledge of the burden of health care associated infections.
- c. Evaluate the appropriate control mechanisms in preventing health care associated infections.
- d. Recognize the components of successful hand hygiene and be aware of its importance in the prevention of health care associated infections.

D. Approach to infectious diseases' emergencies:

- a. Demonstrate knowledge of acute bacterial meningitis.
- b. Demonstrate knowledge of febrile neutropenia
- c. Demonstrate knowledge of acute epiglottitis.
- d. Demonstrate knowledge of necrotizing skin and soft tissue infections.
- e. Describe rapid actions in emergency cases and manage empirical therapy.

E. Approach to genitourinary tract infections:

- a. Identify the clinical presentation of urinary tract infections in various patient populations
- b. Describe laboratory tests used to diagnose urinary tract infections.
- c. Develop a management plan for urinary tract infections and recognize the importance of antibiotic resistance.
- d. Demonstrate knowledge of sexually transmitted diseases causing urinary tract symptoms.

F. Therapeutic approach to AIDS and related opportunistic infections.

- a. Define the relationship of infection and different types of immunosuppression states.
- b. Explain the natural history of the HIV infection and pathogenesis of opportunistic pathogens.
- c. Define AIDS related conditions.
- d. Describe basic laboratory tests used for the diagnosis of HIV infection.

G. Rational use of antibiotics

- a. Evaluate appropriateness of antibiotic drug therapy based on clinical presentation and accompanying clinical data.
- b. Evaluate appropriate antibiotic drug selection, administration and be aware of the principles of age related, hepatic and renal impairment conditions.
- c. Demonstrate awareness of antimicrobial resistance problems during treatment of infections.

H. Approach to pandemic cases

- a. Clinical management of suspected or confirmed pandemic /epidemic patients.
- b. Evaluation, isolation approach and management of patient with suspected respiratory pandemic agents: such as Covid 19 ...etc

4. Gastroenterology

- a. To carry out the initial history and physical examination and plan the diagnostic work-up for the more common gastrointestinal disorders
- b. To know how to use laboratory tests and imaging modalities in the most appropriate and cost-effective way.
- c. To approach patients with GI emergencies, give them primary care and know when and how to refer them to tertiary centres.
- d. To make differential diagnosis from symptom to clinical evaluation of common GI disorders presenting with dysphagia, abdominal pain, diarrhea, vomiting, coma etc...
- e. To understand the major symptomatology of esophageal motility disorders, to know about their pathophysiology and diagnostic work up, to recognize gastroesophageal reflux disease and its complications, to know the therapeutic options for GI motility disorders including gastroesophageal reflux disease.
- f. To know how to approach patients with acute and chronic GI bleeding, to make differential diagnosis of diseases causing upper and lower GI bleeding and diagnostic tests pertinent to the conditions, the drugs for GI bleeding.
- g. To know the definition of dyspepsia; to identify functional dyspepsia, to know how to evaluate a patient with dyspepsia and peptic ulcer disease,
- h. To know diseases causing acute and chronic diarrhea, to make differential diagnosis of diarrhea, to know how to evaluate and manage a patient with acute or chronic diarrhea.
- i. To understand the burden and prevalence of most common causes of constipation, to learn the differentiation of organic and functional causes of constipation, to understand the diagnostic tests for constipation to learn the treatment approaches for functional constipation, to learn and be aware of the possibility of different treatment options for organic causes of constipation.
- j. To know how to approach a patient with jaundice, to make differential diagnosis and to use lab tests / imaging studies for its diagnosis
- k. To know how to approach a patient with ascites, to differentiate portal hypertensive from malignant ascites or other causes of ascites. To know how to manage a patient with ascites.
- l. To make the differential diagnosis of elevated aminotransferases, cholestatic enzymes, bilirubin levels and to know how to distinguish liver pathologies according to the laboratory tests.
- m. To define irritable bowel syndrome (IBS), describe how to manage the patients with IBS and know when and how to use drugs in this setting.
- n. To understand the pathogenesis of the inflammatory bowel diseases (IBD), to classify IBD, to know about the symptoms, physical findings, diagnosis and treatment of the Ulcerative colitis and Crohn's disease
- o. To know the complications of the liver cirrhosis, to manage complications of liver cirrhosis in primary care level.
- p. To understand the importance of acute and chronic viral hepatitis, to name and classify the hepatitis, to describe the epidemiology, risk groups, transmission routes, symptoms, physical findings, diagnosis, complications and treatment of the viral hepatitis. To know prevention measures and vaccination against viral hepatitis infection
- q. To know how to approach to patients with acute liver failure, to define and make differential diagnosis of conditions causing acute and acute on chronic liver failure, to know how to evaluate a patient with acute liver failure, to know when and how to refer a patient with acute liver failure to a transplantation centre, to know about drugs used in acute liver failure,
- r. To be familiar with presentation and features of gallstone disease and its complications, to know about the methods for diagnosis and treatment of pancreatobiliary disorders

- s. To understand obesity related gastrointestinal problems and approach to their management
- t. To know about alcohol induced liver and pancreatic diseases, their prevention and treatment
- u. To outline disease burden in gastrointestinal cancers, to know about their prevention, nutritional aspects of carcinogenesis and approach to patients with common GI cancers
- v. To give patients dietary recommendations for a healthy life, prevention from chronic debilitating diseases and maintain their health with the medical condition they suffer from.

5. Hematology

- a. Take a history from a haematology patient
- b. Determine pathological findings in the examination of the haematology patient
- c. Construct a differential diagnosis following history taking and physical examination
- d. Ask for the necessary laboratory tests to clarify the differential diagnosis
- e. Comment on the haematological laboratory tests
- f. Define the basic histological, physiological, biochemical and genetic properties involved in haematological processes
- g. Describe the pathology which occurs when these normal processes are disturbed
- h. Explain the clinical and laboratory features of common blood disorders including haematological malignancies, anaemias, clotting disorders and transfusion problems and their management

6. Medical Oncology

- a. Be familiar with cancer as a global health problem worldwide
- b. Describe reasons for development of cancer: genetic/ environmental/viral
- c. Know most frequent and worst prognostic cancers in men and women
- d. Define risk factors for development of cancer
- e. Know preventive measures for common cancers
- f. Understand/describe behavioral changes needed to prevent cancer
- g. Know recommended cancer screening for normal risk people
- h. Know therapeutic interventions for cancer prevention
- i. Know aims of cancer treatment: curative, palliative
- j. Know how cancer therapy works, main therapeutic modalities: CT, RT and biologic therapies
- k. Make differential diagnosis and know treatment of oncologic emergencies
- l. Know principles of pain management in cancer patients
- m. Know early and late side effects of cancer therapy
- n. Know how to communicate with cancer patients: compassionate caring, sharing bad news
- o. Know risk factors, screening, diagnostic procedures, staging and treatment of Breast Cancer
- p. Know risk factors, screening, diagnostic procedures, staging and treatment of Lung Cancer
- q. Know risk factors, screening, diagnostic procedures, staging and treatment of Colorectal Cancer
- r. Know risk factors, screening, diagnostic procedures, staging and treatment of Prostate Cancer

7. Rheumatology

- a. Obtain proficiency in performing a comprehensive musculoskeletal system exam.
- b. Develop a reasonable differential diagnosis for both monoarticular and polyarticular presentations of arthritis.
- c. Develop a reasonable differential diagnosis for connective disease and vasculitis conditions
- d. Be familiar with clinical presentation of some common rheumatic diseases such as rheumatoid arthritis, spondylarthritis (including psoriatic arthritis, reactive arthritis, ankylosing spondylarthritis), and uncommon ones such as Familial Mediterranean Fever, Bechet's Disease

- e. Be familiar with and proficient in the use of an expanded history of present illness and review of systems pertinent to musculoskeletal and rheumatic disorders
- f. Understand the usefulness and limitations of immunologic testing
- g. Understand indications for arthrocentesis and the interpretation of synovial fluid result.
- h. Acquire an understanding of the use of oral, parenteral and intra-articular corticosteroids, non-steroidal anti-inflammatory agents, immunosuppressive and biologic agents in rheumatic diseases.
- i. Recognize indications for use and major untoward effects of drugs and the monitoring for drug toxicity.
- j. Participate in patient education.

8. Endocrinology

After completing this internship block, the students will be able:

- a) To use the clinical reasoning approach in the diagnosis, differential diagnosis, management and prevention methods of acute, chronic or congenital endocrine system diseases and metabolic diseases.
- b) To explain the basic principles and approaches in the epidemiology, clinical, laboratory and radiological diagnosis and management of clinical and emergency situations in endocrinological diseases that are frequently encountered in primary care.
- c) To take an appropriate history, perform physical examination and make differential diagnosis, take action on pharmacological and non-pharmacological treatment options for clinical and emergency situations in endocrinological diseases that are frequently encountered in the primary care.
- d) To create accurate and reasonable patient records, and hand over patients safely and effectively
- e) To know when, whom and how to refer patients to tertiary centers in case.
- f) To use appropriate laboratory tests and imaging modalities as needed.
- g) To determine pharmacological and non-pharmacological treatment options for clinical and emergency situations which are frequently encountered in primary care, with an evidence-based medical approach in the context of the patient
- h) To make differential diagnosis from symptom to clinical evaluation of common endocrine disorders presenting with dryness of mouth, polyuria, polydipsia, nocturia, weight changes, growth and developmental delay, menstrual irregularities, sexual dysfunction, infertility, galactorrhea, delayed or early puberty, hirsutism, neck pain, neck lumps, skin and hair changes, palpitations, dizziness, tiredness, excess sweating, high or low blood pressure, hyper- or hypothermia.
- i) To be aware of pituitary related disorders.
- j) To know in which cases to suspect pituitary adenomas, to recognize the symptoms of functional pituitary disorders; pituitary adenomas, hyperprolactinemia/prolactin adenoma, acromegaly, Cushing's disease, hypopituitarism, diabetes insipidus.
- k) To understand major symptomatology of pituitary disorders, to know about their pathophysiology and diagnostic work-up, to know the outlines of diagnosing these diseases and make differential diagnosis.
- l) To be aware of thyroid disorders and to approach acute and chronic thyroid disorders. To know the epidemiology, pathophysiology and symptoms of thyroid disorders.
- m) To obtain proficiency to make a complete thyroid and neck examination.
- n) To know pathophysiology of thyroiditis, thyroid nodules and thyroid carcinomas and to recognize and make diagnostic work up for these disorders.
- o) To understand the indications for thyroid fine needle aspiration biopsy
- p) To develop a reasonable differential diagnosis of thyroid disorders which cause thyrotoxicosis or hypothyroidism.
- q) To treat acute and chronic situations besides to know how to approach and treat emergencies of thyroid disorders.

- r) To be aware of adrenal diseases.
 - s) To know in which cases to suspect, and recognise the symptoms adrenal diseases; primary hyperaldosteronism, Cushing's syndrome, pheochromocytoma, congenital adrenal hyperplasia, adrenal insufficiency and adrenal carcinoma.
 - t) To know when to suspect, the definition and the pathophysiologic mechanisms causing secondary/ endocrine hypertension.
 - u) To approach patient with secondary hypertension for differential diagnosis by recognizing and making differential diagnosis of causes like Cushing syndrome, hyperaldosteronism and pheochromocytoma.
 - v) To know the definition of adrenal incidentaloma and how to approach for a proper differential diagnosis and discriminate benign and malignant adrenal lesions.
 - w) To know the definition and diagnostic criteria of diabetes mellitus. To know risk factors for diabetes mellitus and to know when to screen for diabetes mellitus.
 - x) To be aware of the burden and complications of diabetes mellitus and to know the epidemiology.
 - y) To define the target population, method and implementation strategies of control, screening programs for protection and disease prevention
 - z) To understand major symptomatology of diabetes mellitus, to know about pathophysiology and diagnostic work up, recognize the disease.
-
- aa) To classify types of diabetes mellitus according to symptoms, findings, physical examination and laboratory work up.
 - bb) To obtain proficiency to make a complete physical examination for possible complications of diabetes mellitus like diabetic neuropathy exam
 - cc) To understand pathophysiologic mechanisms and screen patients appropriately for acute and chronic complications of diabetes mellitus.
 - dd) To be aware of the harms of hypoglycemia, to know the definition and treatment of hypoglycemia.
 - ee) To know to take actions to prevent the complications of diabetes mellitus
 - ff) To participate in patient's education for diabetes mellitus
 - gg) To treat patients with diabetes mellitus and to know when to refer to a tertiary center
 - hh) To know the pathophysiologic mechanisms of acute complications of diabetes mellitus; diabetic ketoacidosis, hyperosmolar nonketotic hyperglycemic state.
 - ii) To know how to approach in emergency cases and treat accordingly.
 - jj) To know the symptoms and pathophysiologic mechanisms of menstrual irregularities and sexual dysfunction disorders.
 - kk) To make the differential diagnosis.
 - ll) To know the symptoms and signs of calcium metabolism disorders.
 - mm) To know the definition and effects of vitamin D deficiency and take action to prevent.
 - nn) To classify and make differential diagnosis for both hypercalcemia and hypocalcemia
 - oo) To know how to approach patient with hyper- or hypocalcemia and treat accordingly
 - pp) To know the risk factors for osteoporosis and to make an appropriate diagnosis
 - qq) To be aware of endocrine system related emergencies.
 - rr) To know when to suspect thyroid storm, mixedema coma, hypercalcemia, hypocalcemia, pituitary apoplexia, diabetic ketoacidosis and other diabetic emergencies
 - ss) To know the outlines of diagnosing these diseases and making differential diagnosis

Clerkship Aims

This course aims to provide basic knowledge about the etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and treatment of child diseases and preventive measures.

Students will be able to interpret laboratory results, findings of radiological examinations. Additionally, they will learn what their responsibilities are and acquire the necessary attitudes and behaviors about 'pediatric patients' rights and privacy.

Clerkship Outcomes

By the end of this clerkship, the students will be able to:

1. Perform pediatric history taking and make systematic physical examination
2. Perform pediatric and neonatal resuscitation
3. Perform neonatal physical examination and nursery care, diagnose high risk newborn and neonatal emergencies
4. Diagnose acutely ill child and treat basic pediatric emergencies
5. Learn the follow-up of a healthy child, pediatric screening programmes
6. Perform basic vaccination skills
7. Evaluate the growth, development and pubertal stage of a child
8. Define pediatric nutrition principles
9. Make differential diagnosis of fever in pediatric patients
10. Make differential diagnosis of cough in pediatric patients
11. Make differential diagnosis of abdominal pain in pediatric patients
12. Make differential diagnosis of vomiting in pediatric patients
13. Make differential diagnosis of anemia in pediatric patients
14. Define management of pediatric trauma patient
15. Recognize pediatric neglect and abuse patients

Assessment Methods	<ul style="list-style-type: none"> • Written Final Exam (ASOS) • Structured Oral Exam • Case-Based Learning Assessment • History Taking and Physical Examination Assessment <p>(Should take at least 60/100 points to be considered successful)</p> <ul style="list-style-type: none"> • CASE Performance Assessment <p><i>Failure to sign in will be interpreted as absence; $\geq 20\%$ absence requires repeating the course</i></p>

Clerkship Aims

This course aims to provide necessary knowledge about the etiology, pathogenesis, clinical symptoms and signs, differential diagnosis and treatment of male and female genital diseases and preventive measures. Students will be able to interpret laboratory results, findings of radiological examinations and perform several interventions. Additionally, they will learn what their responsibilities are and acquire the necessary attitudes and behaviors about 'patients' rights and privacy.

Clerkship Outcomes

By the end of this clerkship, the students will be able to:

Diagnose pregnancy, take antenatal care of pregnant woman, identify high risk pregnancies, can refer appropriate patients to specialized tertiary centers and define obstetric emergencies

1. Perform basic obstetric examination.
2. Define conditions for and describe stages of normal vaginal birth and summarize normal labor management.
3. Describe indications for operative vaginal delivery and cesarean section.
4. List common complications of labor and delivery and summarize their basic management principles
5. Perform basic gynecological examination, define physical findings.
6. Take cervicovaginal PAP smear and obtain vaginal swab for microbiological evaluation.
7. Describe common gynecological pathologies and summarize their treatment options.
8. Describe symptoms and physical findings of common gynecological cancers, define screening protocols of gynecological cancers amenable to screening and refer these patients to appropriate centers.
9. Define diagnostic criteria of infertility, describe the basic evaluation of infertile couples and explain the principles of their management.
10. Define common contraceptive methods, describe their advantage and disadvantage and counsel couples regarding the most appropriate method of contraception.
11. Describe symptoms and physical findings of common benign gynecological diseases and define their clinical management.
12. Describe urinary incontinence, define basic principles of physical examination of patients with urinary incontinence and summarize their management.
13. Define perimenopausal changes and summarize the management of common conditions of these patients.

Assessment Methods	<p>Failure to sign in will be interpreted as absence; ≥ 20 % absence requires repeating the course, Clinical assessment (By, history taking, homework and discussion, of relevant cases. Contributes to 10 % of final points.) Written final exam (Multiple choice questions, contributes to 50 % of final points) Structured oral exam (contributes to 40 % of final points)</p>

Educational Methods

Theoretical lectures and practical courses, bedside education, discussions, ward rounds, case presentations, practice in operation rooms, practice in ward and outpatient clinics, practice in coronary and cardiovascular surgery intensive care unit

Clerkship Aims

This course aims to provide necessary knowledge about the etiology, pathogenesis, clinical symptoms and signs, differential diagnosis and treatment of cardiovascular diseases. Students will be able to interpret laboratory results, findings of radiological examinations and observe several interventions. Additionally, they will learn what their responsibilities are and acquire the necessary attitudes and behaviors about 'patients' rights and privacy.

Clerkship Outcomes

By the end of this clerkship, the students will be able to:

Cardiology

- A. Know the examination of cardiovascular system
- B. 1- Define acute coronary syndromes, 2- Describe how to manage the acute coronary care patients, 3- Know how to use the drugs in the acute coronary syndromes.
- C. 1- Define chronic ischemic heart diseases 2- Describe how to manage chronic stable angina, 3- Know risk factors and prevention of chronic ischemic heart diseases.
- D. 1- Approach patient with a chest pain 2- Diagnose cardiovascular emergency, 3- Treat the patient with cardiovascular emergency.
- E. 1- Know the diagnosis and classification of the hypertension (primary/secondary) and options of therapy for each stage. 2- Define the complications (end-organ damage) of the hypertension
- F. 1- Define basic mechanisms of cardiac arrhythmias and diagnose basic arrhythmias, 2- Classify the antiarrhythmic drugs according to their action, 3- Define the nonpharmacological treatment options in basic arrhythmias and know the indication of use of these methods 4- Know the medical (acute and chronic treatment) and possible catheter based treatment of basic cardiac arrhythmias,
- G. 1- Environment/genetic predisposition of the hypercoagulation status 2- How to manage the acute pulmonary embolism and deep venous thrombosis. 3- Prophylaxis of high risk patient for thrombotic events
- H. 1- Definition of the pulmonary hypertension 2- Definition of the right heart failure 3- Know the causes of pulmonary hypertension and right heart failure 4- Therapy of the pulmonary hypertension and right heart failure
- I. 1- Define the pathophysiology, diagnosis, severity, prognosis, treatment options and prevention of valvular pathologies (including rheumatic fever and infective endocarditis)
- J. 1- Describe the cause of pericardial disease 2- Know the types of pericardial disease, clinical features, the necessary laboratory testing and therapeutic approach.
- K. 1- Diagnose the patient with a cardiac mass 2- Describe how to approach such a patient
- L. 1- Define genetic and secondary causes of hyperlipidemia, 2- Define risk stratification of hyperlipidemic patients, 3- Describe drugs that affect lipid metabolism, 4- Describe non-pharmacological lipid lowering therapy, 5- Know when and how to use lipid lowering drugs
- M. 1- Diagnosis of the frequent cardiomyopathies 2- Long term treatment options 3- Prevention of the sudden death
- N. Know cardiovascular problems in pregnancy
- O. Know relationship of endocrine diseases and diabetes with cardiovascular problems

Cardiovascular Surgery

- A. Know anatomy of the cardiac structures and major vessels, structures of the heart valves, cardiac conduction system, coronary artery anatomy. Define physiological terms like cardiac output, preload, afterload, stroke volume, central venous pressure.
- B. Define the functional effects of antiarrhythmics, anticoagulants, catecholamines and positive inotropic/chronotropic agents, nitric oxide, vasodilators, diuretics, beta blockers and antihypertensive drugs.
- C. List common complications after cardiac operations. Describe and become aware of symptoms and physical findings postoperative complications (myocardial infarction, aortic dissection, aortic rupture, cardiac tamponade, low cardiac output syndrome, heart failure and pulmonary embolism).
- D. Describe common peripheral venous and arterial pathologies like deep vein thrombosis and arterial embolism and summarize their treatment options.
- E. Know to analysis of blood gas parameters, be aware of hypoxemia and cyanosis.
- F. Define symptoms and physical findings of basic congenital heart diseases and timing for intervention and surgery.
- G. Know cardiopulmonary bypass circuit and how it is used for open heart surgery.
- H. Review diseases of aorta and great vessel and learn management of patients with the diagnosis of various acute and chronic aortic diseases.
- I. Know basic approach to vascular and cardiac trauma.

Assessment Methods

Theoretical and Practical Subject Committee Exams

- Failure to sign in will be interpreted as absence; ≥ 20 % absence requires repeating the course,
- Written final exam (Multiple choice questions, contributes to 60 % of final points)
- Structured oral exam (contributes to 40 % of final points)

Educational Methods	Lectures Case Discussions (Interactive) Bed-Side Training Case Based Learning Out-Patient Clinics Operating Room
----------------------------	---

Clerkship Aims

General Surgery

The aim of this course is to teach basic surgical topics to forth year medical students with lectures, case based learning, paper presentations and bed side training. Each student expected to incorporate basic knowledge and clinical experience to obtain modern patient-oriented clinical care. During the course, the students will have opportunities to join out- and in- patient care with medical team and other health professionals.

Thoracic Surgery

This course aims to provide necessary knowledge about the etiology, pathogenesis, clinical symptoms and signs, differential diagnosis and treatment of general thoracic surgical pathologies.

Anesthesiology and Reanimation

This course aims to provide basic knowledge about:

- The general anesthesia, regional anesthesia, and local anesthesia,
 - Basic and advanced monitoring of the patient during anesthesia and ICU,
 - Analysis of arterial blood gases,
 - Pain and analgesics,
 - Basic and advanced cardiopulmonary resuscitation,
- oxygen therapy and mechanical ventilation.

Plastic, Reconstructive& Aesthetic Surgery

This course aims to provide necessary knowledge about the etiology, pathogenesis, clinical symptoms and signs, differential diagnosis and treatment of burns, wound healing, traumas, congenital disorders related to plastic & reconstructive surgery, maxillofacial traumas, aesthetic surgery, breast reconstruction, basic reconstructive surgical methods.

Clerkship Outcomes

By the end of this clerkship, the students will be able to:

General Surgery

- Be familiar to the anatomy of surgical sites
- Describe the symptoms and physical findings of patients with surgical disease, ,
- Analyze the signs and symptoms in a patient
- Outline the principles of managing surgical patients (acute abdomen, hemodynamic instability, hemorogie, etc)
- Differentiate between benign and malignant/ acute and chronic/ emergent and elective surgical disease.

Thoracic Surgery

- Learn basic principles of chest tube insertion
- Management of chest trauma patient.
- Differentiate main thoracic surgical pathologies and know their treatment.
- Define radiological findings of main thoracic surgical pathologies.

Anesthesiology and Reanimation

- Describe basically the administration and the stages of general anesthesia and to list the general anesthetics,
- Describe the regional anesthesia administration
- Describe the local anesthesia mechanisms and to list local anesthetics
- List the basic and advanced monitoring techniques used for anesthetic and intensive care of patients
- Analysis of arterial blood gases and acid-base status
- Describe the algorithms of basic and advanced cardiopulmonary resuscitation in adults.
- Describe the anatomy and physiology of pain, to list the types and characteristics of pain and define the basic principles of pain management.
- Describe the basic principles of oxygen therapy and mechanical ventilation.

Plastic, Reconstructive& Aesthetic Surgery

- Define the basic approach to burn and frostbite injuries
- Learn wound healing principles
- Define the approach to evaluation of craniofacial disorders, cleft lip & palate,
- Learn the basic breast reconstruction methods
- Learn the basic approach to hand and lower extremity injuries
- Learn the basic approach to maxillofacial traumas
- Learn the treatment of malignant melanoma and nonmelanoma skin tumors

Assessment Methods

Objective Structured Oral Exam
Written Exam (MCQ)
Mini Clinical Evaluation Exam (Mini-Cex)
Case Based Learning (CBL)
Pre-Test (CASE)

Bu rehber, Acıbadem Üniversitesi Tıp Fakültesi ders programı kapsamında 5. ve 6. sınıflarda gerçekleştirilen seçmeli stajların kuralları, sürecin işleyişi ve sonuçların teslimi ile ilgili bilgi vermek amacı ile hazırlanmıştır.

İçerik:

1. Bölüm: Yönetmelik maddeleri
2. Bölüm: 5. sınıf seçmeli stajların uygulama esasları
3. Bölüm: 6. sınıf seçmeli stajların uygulama esasları
4. Bölüm: Kurum dışı staj (seçmeli-zorunlu)
başvurularında yapılacak yazışmaların silsilesi

Birinci Bölüm:

YÖNETMELİK MADDELERİ

43. Madde: Klinik Stajların Kurum Dışında Yapılması aşağıdaki gibidir:

a) Seçmeli Stajlar: Seçmeli stajlarını kurum dışında yapmak isteyen öğrenciler başvurularını Fakülte Dekanlığına yaparlar. Başvurular Fakülte Yönetim Kurulu'nda değerlendirilir.

a) Zorunlu Stajlar: Zorunlu stajını yurt içinde veya yurt dışında yapmak isteyen öğrenciler başvurularını dilekçelerine kabul yazısı ve staj içerik bilgisi de ekleyerek Fakülte Dekanlığına yaparlar. Uyum Komisyonu tarafından değerlendirilen başvurular Fakülte Yönetim Kurulunda görüşülerek karara bağlanır.

İkinci Bölüm:

5. SINIF SEÇMELİ STAJLARIN UYGULAMA ESASLARI

5. sınıfta her staj grubunda biri 4, biri 6 haftalık olmak üzere (toplam 10 hafta) iki adet seçmeli staj mevcuttur.

5. sınıf seçmeli stajları:

- Yeni eğitim yılı başlamadan 15 gün önce web sayfasında ilan edilir.
- Stajlar 15 gün süre ile ilanda kalır.
- İlan sonrası belirlenen tarih aralığında öğrenciler seçmek istedikleri stajı Proliz programı üzerinde öğrenci giriş ekranından ders kaydı şeklinde gerçekleştirirler. Öğrencilere seçim yapmaları konusunda yardımcı bir kılavuz verilecektir.
- Kayıtlar ilk başvuru sırasına göre dolar. Tüm öğrenciler, yurtdışı stajı için kabul almış olsalar ya da yurtdışı staja gitmeyi planlıyor olsalar dahi bu dönemde her iki seçmeli ders için de seçim yapmak zorundadırlar.

- Öğrenci seçmeli stajını kurum dışında (yurt içi- yurt dışı, devlet hastanesi, üniversite hastanesi) yapmak istediği takdirde, bunu belirten dilekçe ve ekinde yapacağı kurum ve/veya bölümden kabul yazısı ile Dekanlığa ilgili seçmeli staj tarihinden en az bir ay önce başvurur.
- Eğitim yılı başında seçmeli staj ile başlayacak öğrenciler için başvuru stajları başlamadan 3 gün öncesine kadar yapılabilir.
- Öğrenci kurum dışı yapacağı staj için “seçmeli staj başvuru süresinde” işlemlerini tamamlamış olmalıdır.
- Seçmeli stajını kurum dışında yapacak olan öğrencinin kurum içi stajı kayıttan düşer.
- Kurum dışı staj başvurusu kabul edilmeyen öğrenciler öğretim yılı başında seçtikleri staja devam ederler.
- Seçmeli stajlarda kurum içi aynı staj iki kez tekrar edilemez. Her öğrenci kurum içinde iki farklı staj yapmış olmakla yükümlüdür.
- Kurum dışında yapılacak stajlarda, program uyumsuzlukları nedeni ile staj süresi birleştirilerek yapılabilir. Bu durumda öğrencinin getireceği not, gittiği her seçmeli staj için ayrı ayrı kabul edilir. Öğrenci bu durumu dilekçe ile Tıp Fakültesi Dekanlığı'na bildirmek zorundadır.
- Bir önceki sınıftan staj tekrarı yapanlar, sistemden seçmeli stajlarını seçerler ve programa devam hakkı aldıkları andan itibaren seçmelilerini yapabilirler.
- Gerek kurum içi gerekse kurum dışı seçmeli stajların bitiminde öğrenciler staj yaptıkları sorumlu hocadan kapalı zarf içinde alacakları evrakları staj son gününden sonraki bir hafta içinde Tıp Fakültesi Dekanlığına imza karşılığı teslim etmekle yükümlüdürler.

Üçüncü Bölüm:

6. SINIF SEÇMELİ STAJLARIN UYGULAMA ESASLARI

6. sınıfta iki adet 4'er haftalık (toplam 8 hafta) seçmeli staj mevcuttur.

- 6. Sınıftaki seçmeli stajlar ilgili sadece klinik anabilim dallarında yapılır.
- Bu stajlar ve kontenjanları aralık ayı başında web sayfasında ilan edilir.
- Seçmeli stajların listesi 15 gün süre ile ilanda kalır.
- Bu süre zarfında öğrenciler seçmek istedikleri stajı ProLiz programı üzerinde öğrenci giriş ekranından ders kaydı şeklinde gerçekleştirirler.
- Kayıtlar ilk başvuru sırasına göre dolar. Tüm öğrenciler bu dönemde seçim yapmak zorundadırlar.
- Öğrenci seçmeli stajını kurum dışında (yurt içi-yurt dışı, devlet hastanesi, üniversite hastanesi) yapmak istediği takdirde, bunu belirten dilekçe ve ekinde yapacağı kurum ve/veya bölümden kabul yazısı ile Dekanlığa seçmeli stajların başlama tarihinden en geç iki ay önce başvurur.
- Seçmeli stajını kurum dışında yapacak olan öğrencinin başvurusu kabul edildiği takdirde, daha önceden seçtiği kurum içi staj iptal edilir.
- Kurum dışı staj başvurusu kabul edilmeyen öğrenci daha önce seçtiği staja devam eder.
- Gerek kurum içi gerekse kurum dışı seçmeli stajların bitiminde öğrenciler staj yaptıkları sorumlu hocadan kapalı zarf içinde alacakları evrakları staj son gününden sonraki bir hafta içinde Dekanlığa imza karşılığı teslim etmekle yükümlüdürler.

Dördüncü Bölüm:

Seçmeli Staj Başvurularında Yapılacak Yazışmaların Silsilesi

Seçmeli ve veya zorunlu stajlarını kurum dışında yapılması ile ilgili olarak aşağıdaki silsile uygulanmaktadır;

1. Öğrenci dilekçesinde hangi staj, nerede planlanıyor bilgisi (Dekanlığa verilecek)

1.a. Zorunlu stajlar için

- ✓ Karşı kurumdan kabul yazısı ve yapılacak stajın içeriğini bildiren dilekçe ve ekleri dekanlığa öğrenci tarafından verilir. (Öncesinde karşı kurumun talebi halinde Dekanlıktan üniversitemizdeki stajın içerik bilgisini içeren bir yazı öğrenciye verilebilir).
- ✓ Uyum komisyonu tarafından stajın süre, içerik ve sınama yöntemi ile ilgili eşdeğerliliğini gösteren rapor hazırlanır.
- ✓ Fakülte yönetim kurulu öğrenci dilekçesi, ekleri ve uyum komisyon kararını değerlendirerek stajın kurum dışında yapılmasını kabul veya ret eder.

1.b. Seçmeli stajlar için

- ✓ Öğrenci karşı kurumdan resmi kabul belgesini dekanlığa dilekçe ekinde ilgili başvuru süresi içinde teslim eder.
- ✓ Fakülte yönetim kurulu öğrenci dilekçesi ve eklerini değerlendirerek seçmeli stajın kurum dışında yapılmasını kabul veya ret eder.

2. Fakülte Yönetim Kurulu uygunluk kararı alınır.

2.a. Fakülte yönetim kurulu kararı öğrenci işlerine bildirilerek, sisteme kaydedilir.

2.b. Uygunluk kararı staj formu ile birlikte kapalı zarfta karşı kurum dekanlığına/ilgili birimine resmi yazı ile yollanır.

Kapalı zarf içeriği: Fakülte kurulu onay yazısı; karşı kuruma bilgilendirme yazısı (staj programımız amaçları, ilgili stajın içeriği); staj değerlendirme formu

3. Staj bitiminde staj değerlendirme formu resmi yazı ekinde, kapalı zarf ile Dekanlığa gönderilir. Bu aşamada kurum içi ve/veya kurum dışı stajlarda aksaklıkların yaşanmaması için öğrenciler bu evrakın takibi ve tesliminden sorumludurlar.
